

SYNERGY: *CDM for Sustainable Africa- Capacity Building for Clean Development Mechanism in Sub-Saharan African Countries*  
**Seminar in CDM Projects – Maputo / MOZAMBIQUE**  
**October 05 - 06, 2004**

Closing Speech for the 2<sup>nd</sup> Seminar on CDM For Sustainable Africa

Dr. Eng. Luis Manuel Alves – Representing the Consortium supporting the action

From the expositions we could see that CDM Business is a little complex and complicated one. This is why we should be prepared for the, we must envisage a team work between: Scholars, Public Institutions, private sector and consultants.

Efforts should be put together and capacity be jointed, we must look deeper into our Regional Centre and assure their ability to tackle the CDM issues in a local environment.

It is also a meter of exchanging views and ideas, as we must seek to expand and solidify our networking abilities.

This is an important issue, to find ways to fund the identified projects within the scope of the “CDM Africa” Project.

There is no much time left to do to capacity building in real time- so we must use all tools available, and the WEB Material is one of the best available

It is also very important to go fast and make our potential CDM Proposals and ideas very attractive projects to financing that is what our project is also about.

In saying so, would like to thanks you all for coming here and be with us for these 2 days.

I also take the opportunity to thanks CEISA / UEM – Universidade Eduardo Mondlane for helping to set the Seminar and also for the European Union for financing support to our activities.
